

Review Questions and Exercise

2. Pretest loops test before executing;

Posttest loops execute before testing

3. They run only when the condition is true

5. While

8. Wrong counter initialization causes incorrect looping

16. increment; decrement

19. for; while; do-while;

31. initialization; condition; iteration

int response

for(;;) {

cout << "Hello! Press 1 to exit loop...";

cin >> response;

if (response == 1)

break;

}

51. F

67. replace the code to the below one

bigNum = 1;

count = 0

while (count < power) {

bigNum *= num;

count ++;

}

68. total isn't initialized total = 0;

delete count ++;

average = static_cast<double> total...

a missing " after "The average is

Programming Challenges

```
programs > G+ HW5_PC13.cpp > main()
1  #include <iostream>
2  using namespace std;
3
4  int main()
5  {
6      float total = 0;
7      for (float i = 1; i <= 10; i++)
8      {
9          total += 2 / i;
10     }
11     cout << total << endl;
12     return 0;
13 }
```
